SKILLS

PROGRAMMING

JavaScript Python Java

FRONTEND

React React Native HTML5

CSS3 Tailwind CSS

Responsive Design

BACKEND

Node.js Express.js REST API

JWT Authentication

DATABASE

MongoDB SQL Server

REAL-TIME

Socket.io WebSocket

OBS WebSocket

TESTING

Selenium Postman

Manual Testing

Automation Testing

Azure DevOps

TOOLS

Git GitHub Figma Cursor

ChatGPT AntigravityIDE

EDUCATION

- Software Engineering**
Industrial University of Ho Chi Minh City (IUH)
Expected: Jul 2026

PROFILE

Fresher Web Developer specializing in full-stack and real-time web applications. Experienced in building production-ready systems using React, Node.js, MongoDB, Socket.io, and OBS WebSocket integration. Developed and maintained production-ready web applications used in real-world operational environments, focusing on scalability, reliability, and user-driven improvements.

EXPERIENCE

Broadcast Technician

Mar 2026 – Apr 2026

VPStudio

- Participated in technical operations for professional esports productions including Valorant Challengers SEA and Queen of Glory (QOG).
- Configured and maintained production systems, network infrastructure, and signal workflows in live environments.
- Performed real-time troubleshooting and collaborated with cross-functional teams to ensure stable event execution.

Automation Testing Intern

Aug 2024 – Nov 2024

FPT Software

- Conducted automation testing for web applications using MESHA and Selenium.
- Managed bug lifecycle and defect tracking through Azure DevOps in Agile/Scrum environments.
- Designed and executed test cases for functional, UI/UX, and regression testing.

PROJECTS

PCastPro – Esports Broadcast Overlay & OBS Control Tool

[Code](#) [Demo](#)

Full-stack Developer

React Node.js Express.js MongoDB Socket.io OBS WebSocket

- Developed a real-time broadcast control platform that replaces manual OBS operations with a web-based dashboard.
- Integrated OBS WebSocket and Socket.io to synchronize overlays, scoreboards, and broadcast data in real time.
- Built account-based user management and customizable theme configuration systems.
- Designed MongoDB data models and application architecture for scalability and maintainability.
- Continuously improved the product through multiple iterations based on real user feedback.

IUH Event Check-in System

[Code](#) [Live](#)

Full-stack Developer

React Node.js Socket.io MongoDB JWT

- Developed a QR-code-based event attendance system.
- Implemented JWT authentication and role-based access control.
- Supported real-time attendance tracking for over 100 concurrent users.

AI University Admission Consulting System

[Code](#)

Full-stack Developer

React Python Flask TensorFlow MongoDB

- Built a recommendation system using neural networks and real-world educational data.
- Developed frontend interfaces and backend APIs for recommendation workflows.
- Implemented model training and evaluation using TensorFlow.

ACHIEVEMENTS

- Published a Faculty-Level Scientific Paper on Building a Major Recommendation System using Neural Networks.
- Awarded a Certificate of Merit by the Ward Party Committee for contributions to Youth Union activities and digital solutions.
